

Low-Profile Solar Attic Fan

UMA Solar's New & Improved 35 Watt Solar Attic Fans

NEW
PERC CELL
TECHNOLOGY

Eight Reasons to Buy UMA's Ultra Low Profile Solar Attic Fans.

1. Extends the life of roof shingles and underlayment
2. Reduces HVAC loads and A/C run times during summer
3. Helps Prevent ice damming during winter
4. Reduces damage caused by the build-up of attic moisture year-round
5. Commercial-grade aluminum components powder-coated inside & out for extra durability
6. Panel fits flush to better withstand HVHZ (High Velocity Hurricane Zones)
7. Outstanding 25-year Warranty on all components
8. Qualifies for Solar Tax Credits

Options include:

- ▶ **Thermal Snap Switch**—allows the fan to turn on when the attic temperature reach 80°F and the fan to turn off when the temperature falls to 70°F
- ▶ **Fire Safety Switch**—required in some areas and specially designed to shut down airflow to the fan
- ▶ **Flashing Skirt**—required for tile roof applications to ensure a weather-tight fit
- ▶ **Turret Extension**—for accommodating higher profile S-style tile roofs
